

Homework 2

Math 2568

Attempt before Monday, September 2, 2013

Jim Fowler

I hope you've been enjoying Math 2568 so far. Ask yourself: **are you doing the homework?** If not, please try! I can only point you in the direction you should travel: you must make the journey yourself.

Show your work

When you “solve” a problem, the goal is not merely to give a correct answer! Each problem has a story, and you should *tell the story* by clearly explaining your argument.

The one boxed problems have solutions in the back

Even if you don't do all the suggested problems (though you should!), the one boxed problems really should be done since you can check your answers quickly in the back of the textbook.

Suggested Problems for Practice

From §1.2 (starting on page 14), do problems 8, 18, 28, 50, 54.

From §1.3 (starting on page 28), do problems 2, 4, 20, 27, 28.
